About Us

- Weather and Water are our Business -

Incorporated in 1981, **Info-Electronics Systems Inc. (IES)** is an engineering, integration and project management company working in the field of computer-based technologies. IES, alongside its CRM services, develops systems and application software for Meteorology, Hydrology, Remote Sensing, Environmental Monitoring, Communications and Instrumentation.

With Headquarters in Montreal, Canada, IES also has an additional office in New Delhi, India. We have a strong Process Management Methodology as our Quality Management System (QMS) is registered as being in conformity with ISO 9001:2015.

Technology Domain

Technology Based Software Development:

Meteorology and Hydrology

Remote Sensing

Image Processing

Environmental Monitoring

Terrestrial & Satellite based Communications

Telemetry

Methodology & Services Domain

Employment of state-of-the-art techniques:

Project Management

System and Software Development

Configuration Management

Training and Support

Quality Assurance

IES - Products, Solutions and Services

IES is a systems integration and *value-added services* company. We execute most high value projects with our partners.

Meteorology Instruments & Solutions

- *Automated Weather Stations*
- *Automated Weather Observing System*
- *Solar Monitoring Station*
- *Solar PV Monitoring Stations*
- *Road Weather Monitoring Station*
- *Automatic Rain Gauges*
- *Hand Held Weather Stations*
- *Indoor, Controlled Environmental Systems*

Metrology and Calibration

- *Temperature*
- *Humidity*
- *Pressure*
- *Rain fall*
- *Wind*
- *Visibility*

Hydrology Instruments & Solutions

- *Water Quality Sensors*
- *Smart Water Level*
- *Water Flow*
- *Rain gauges*
- *Discharge measurement*
- *Etc...*
- *Flood Monitoring & Warning Stations*
- *Hydrological Decision Support Systems*

Other Hydro-Met Instruments & Solutions

- *Remote Sensing LIDAR Detection*
- *Air Quality Station*
- *Haze Monitor*
- *Pollutant Source VOC Monitor*
- *Microwave Radiometers*
- *Weather Radars / Wind Profilers*
- *Lightning Detection*
- *GHG Monitoring*
- *Disdrometers*
- *Present Weather Station*
- *EWS Early Warning Systems*

Davis Instruments - Automatic Weather Stations

Soil Temperature, Relative Humidity and Leaf Wetness Sensor Station

Air Quality

Enviromonitor Transmitter

Siap+Micros - Automatic Weather Stations

Siap+Micros designs, manufactures and installs systems and turnkey services for environmental monitoring.

Anemometers

Sensor for Wind Direction, Wind speed, separated or combined in a single sensor.

Dataloggers

Atmospheric Pressure

Precision and reliable electronic barometers with analog and digital output proportional to the atmospheric pressure detected.

Hydrometric and Snow Level

Monitoring sensors for level of hydric bodies such as sea, river, basin, or in general water bodies and of snow level on a specific surface.

Solar Radiation

Sensors for measurement and detection of the different characteristics of the solar radiation.

Temperature

Sensors of temperature with PT100 sensing element. They are available in different versions depending on the needs.

Humidity

Sensors for Relative air Humidity monitoring. Versions for interior and external environments (with UV protection screens) are available.

Precipitation and Atmospheric Sedimentation

Instruments for rainfall or generally for the atmospheric precipitation measurement. They are available in different features according to the needs.

Combined Temperature and Humidity

Sensors for Air Temperature and Relative Humidity monitoring, combined into a single body. Versions for interior and external environments are available.

EKO Instruments - Solar Monitoring Station

Accurate solar radiation measurements

IESI is a pioneer in providing complete solutions in the solar energy sector. IES takes full responsibility in providing state of the art solar instrumentation for the following applications.

- Accurate solar radiation measurements
- DHI Measurements
- Solar Radiation Measurements in PV applications
- DNI measurements with a Pyrheliometer
- DNI measurements at CPV sites
- Measuring spectral irradiance
- PV Modules performance assessment
- PV Site Solar monitoring
- Stability monitoring of Sun simulators
- Spectral DNI Measurements
- Solar radiation energy budgets studies
- Spectral irradiance portable solutions
- Outdoor material testing
- Measure spectral irradiance of sun simulator
- Application which require a fast response time

Pyranometers

Sun Trackers

Spectroradiometers

PV Met Stations

Pyrheliometers

UV Sensors

Solar Monitoring

Si-Pyranometers

All Sky Imager

Pygeometers

NET Radiometers

Sunshine Duration

Sky Scanners

Handheld Spectroradiometers

Heat Flux Sensors

Thermal Conductivity Testers

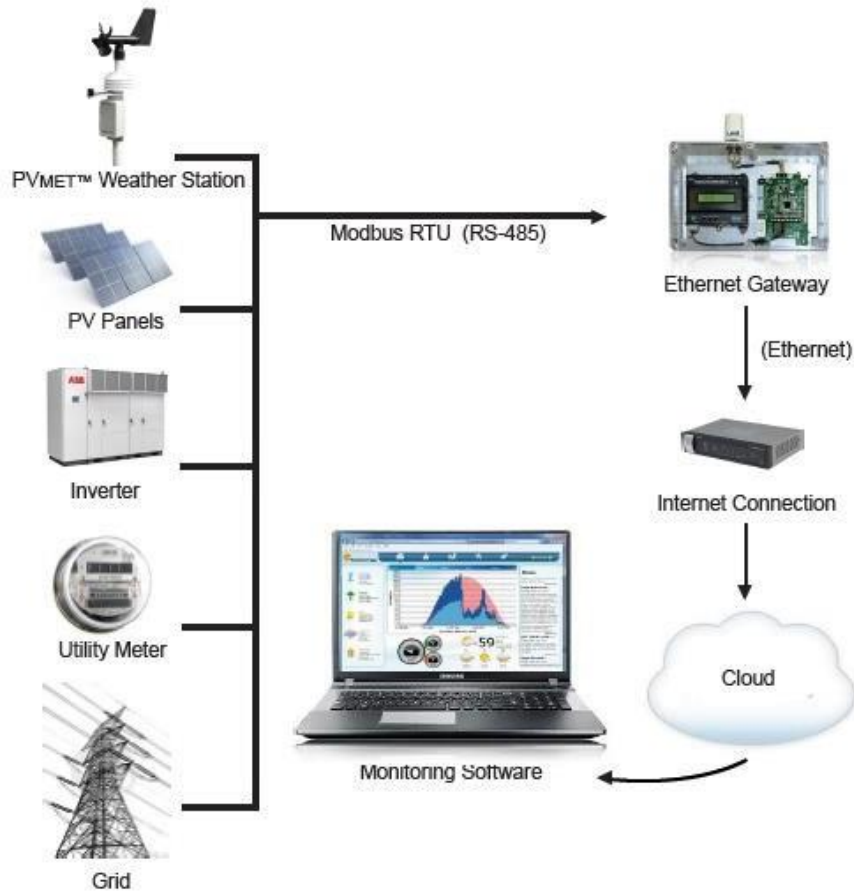

From its founding in 1974, RainWise has paved the way for professional-grade meteorological equipment to empower operations leaders in industries ranging from agriculture, industrial, manufacturing, engineering, and technology to make informed decisions based on weather data.

PV met Weather Station

GET THE BANKABLE DATA YOU NEED for Monitoring and Maintenance!

The PVmet™ weather station provides strategic environmental data that significantly increases the value of any on-site monitoring system. This fully assembled station allows for rapid out-of-the-box installation and simple hook up with standard Modbus RTU interface.

PVmet™ Meteorological Stations

Professional Monitoring for Utility, Commercial & Industrial Solar Arrays

Maximize PV Output with Informed Efficiency Monitoring

Leading inverter and monitoring companies have chosen RainWise as the #1 provider of meteorological stations due to our proven reliability, easy deployment and accurate data. The RainWise PVmet™ family of weather stations offers a powerful add-on to any solar plant monitoring system. Featuring accurate sensors and standard communication integration, the PVmet™ is an economical addition to insure the highest PV panel output. Standard models come fully assembled, are easy to install and are fully operational in a matter of minutes. Every model of PVmet™ offers:

Efficient Operation	Rugged, Compact Design	Multiple Communication Protocols
<ul style="list-style-type: none"> Comes fully assembled, easy set-up Accurate weather sensors for efficiency monitoring Operates over a broad range of temperatures 	<ul style="list-style-type: none"> Durable & weather resistant Ultra-violet inhibited Stainless steel hardware Optional add-on sensors 2 year warranty 	<ul style="list-style-type: none"> Most models SunSpec certified or compliant Simple integration via Modbus RTU interface using RS-485

Their meteorological products are widely used in traffic control, offshore platforms and wind plant applications in China.

They manufacture and develop the following products:

- *2D ultrasonic anemometer*
- *24GHz Radar rain gauge*
- *Optical rain gauge*
- *all-in-one ultrasonic weather station*
- *forward scattering visibility sensor*
- *infrared remote road surface state & temperature sensor*
- *tunnel luminance/illuminance sensor*
- *tunnel ultrasonic airflow sensor, CO/VI sensor*
- *Davis VP2 compatible solar radiation, ultrasonic anemometer (plug & play)*

Vehicle AWS with APP and Software

AT/RH/BP

Radar Rain

Ultrasonic Anemometers

All in One Weather Station

Mini Weather Station

Surface Temperature

Portable Weather Station

Visibility Sensor MINI Present Weather Sensor

- Back-scattering principle, compact structure
- Weather status detection, identify rain, snow, hail
- Various output signal for option.
- No moving parts, maintenance-

Visibility Sensor

- Especially built for Traffic Applications
- 10m to 10km measurement range
- Ideal for road long distance visibility data collection
- Accurate and traceable measurement
- High mechanical strength
- Low maintenance requirement
- Simple Installation and Maintenance
- Compact forward design
- Not affected by local lights
- Hood heating for use in extreme environments

Smart Visibility Sensor

- Easy installation and start-up
- Analogue and digital Interfaces
- Correct measurement long term stability
- Representative measurement
- Low installation expenditures
- Maintenance on request
- Quick response time
- 10 m to 3000 m

Non-contact Road Surface State Sensor

- Remote monitoring water, ice and snow
- Remote surface state sensing
- Measure amount of water, ice, and level of grip
- No embedded installation
- Anti-corrosion
- Infrared detection, distance up to 15.5 meters
- Easy for installation with

Tunnel Visibility Sensor

- *Non Contact, High resolution visibility measurement*
- *Measurement is completely free from the influence of other stray light sources*
- *Specially designed for harsh environment of tunnel;*
- *Measurement is totally free from vibration caused by environment and moving vehicles;*
- *Instrument is equipped with state display, fault alarm and data storage function, which is convenient for debugging and maintenance of equipment*
- *Unique compensation*

Tunnel Ultrasonic Wind Sensor

- *Especially built for Traffic Applications*
- *Cast aluminum body, anodized surface for harsh environments in the tunnel*
- *Ultrasonic measurement free from influence of ambient temperature*
- *Non-contact detection, no moving parts, reduce the failure rate*

Crossed Tunnel Ultrasonic Wind

- *Cast aluminum body, anodized surface for harsh environments in the tunnel*
- *Large sampling area, accurately reflect the air flow rate in tunnel*
- *Ultrasonic measurement free from influence of ambient temperature*
- *Non-contact detection, no moving parts, free of maintenance*

Tunnels Entrance Photometer

- *CIE Approved measurement technology*
- *Accurate measurement of tunnel entrance luminance*
- *Designed specifically for tunnels*
- *Rugged construction*
- *Simple installation/operation*
- *Isolated 4-20mA analogue outputs*
- *Alarm relay contacts*
- *ModBus serial comms*

Tunnel Height Detector

- Uses a small double-layered beam-type structure (consisting of an infrared light transmitter and receiver) with two invisible infrared beams as a warning line.
- When a vehicle exceeding the limit height passes, when the car hits the photoelectric signal, the beam is blocked, the receiver sends an alarm signal (switching amount), and can trigger other devices
- Suitable for highway tunnels, urban underpass tunnels, highway bridges, etc.

Everise Technology Ltd. designs and produces a complete range of state of the air analyzers, sampling systems, calibration systems, data acquisition and software for the measurement and reporting of regulatory pollutants particulates.

Everise major products include:

- Remote sensing lidar monitoring system,
- Ambient air quality monitoring system,
- Online VOCs monitoring system,
- Haze monitoring & early warning system, and mobile monitoring vehicle system.

Sensor-based Air quality Monitor InterAir

InterAir is a sensor-based air quality monitor for real-time measurement of key pollutants in ambient air. The InterAir is designed with small sensitive sensors to acquire air quality information, and a unique software platform for data processing and data analysis. The system comes with robust hardware including well-designed enclosure, GPRS or 3G communication, solar panel & batteries, and user-friendly software platform for real-time AQ data display, auto calibration, AQ forecast etc.

It's widely used in larger-scale deployment for traffic management across the roads, tunnels or airports, for fence line monitoring around construction sites or industrial sites, for air quality monitoring in urban cities or countryside.

General parameters

- *Power supply: When there is a sudden power failure, the system can be powered by the back-up batteries. The solar panel is optional for power supply;*
- *Data storage: The system can save at least 6 months measurement data;*
- *Calibration: Manual-calibration and auto-calibration are available;*
- *Power: Less than 20W;*
- *Working Temperature: -20°C-50°C;*
- *Locating: GPS;*
- *Communication: 4G, GPRS, WIFI, RS485;*
- *Lifespan: >2 years;*

EVPM 200- PM₁₀ Particulate Analyzer

Instrument Configuration

- *EVPM200 analyzer*
- *External pump components*
- *HST heating sampling tube with constant temperature (adjustable length)*

Application Areas

- *Ambient air quality monitoring*
- *Indoors air quality monitoring*
- *Long-term background environment research*
- *Particulates monitoring of factory, park and construction site*
- *Particulates monitoring of wasteyard*

EVPM 100 - PM_{2.5} Particulate Analyzer

Instrument Configuration

- *EVPM100 analyzer*
- *External pump components*
- *HST heating sampling tube with constant temperature (adjustable length)*

Application Areas

- *Ambient air quality monitoring*
- *Indoors air quality monitoring*
- *Long-term background environment research*
- *Particulates monitoring of factory, park and construction site*
- *Particulates monitoring of wasteyard*

Zoglab Microsystems - Handheld Weather Station

ZOGLAB product lines cover areas of environmental and atmospheric monitoring, metrology and calibration, advanced meteorological systems, optical telemetry, and vertical observation.

In addition to professional instruments and systems, ZOGLAB designs, develops, and delivers highly customized solutions and turnkey projects.

Key application industries include;

- *Meteorology,*
- *Hydrology,*
- *Aviation,*
- *Pharmaceutical,*
- *Chemicals, and*
- *Agriculture.*

Wireless Communication

Rechargeable

Rugged and Compact

External Displays

Water-proof Air Tap

Ultrasonic Wind Sensor

High-bright Display

Multiple Elements

Various - Automatic Rain Gauges

dualBase
Tipping Bucket Rain Gauge

Standalone or Rain Gauge Network using GSM/GPRS Telemetry

MPS system Ltd.
Total Rain Weighing Sensor

Excellent tool to measure all types of precipitation within wide temperature range, harsh wind and snow conditions.

OSI
Optical Rain Gauge (ORG)

- *Instantaneous precipitation rate measurement*
- *Rainfall as light as 0.1 mm/hr. or as heavy as > 500mm/hr easily measured*
- *No evaporation errors, overflow or mechanical limits to worry about*
- *No moving parts, no antifreeze chemicals*
- *Operates 24/7 under harsh field conditions*
- *Dust / dirt on lenses does not affect measurement; ultra-low maintenance*
- *Lasts for years*

Beijing Precision Wave Instrument Co., Ltd provides their customers with safe and reliable products, solutions and services in the fields of:

- Industrial automation
- Hydrology and
- Water conservancy

26Ghz Smart Radar Water Level Meter

- Water level monitoring of lakes, rivers, reservoirs, open channels and tides.
- Water level monitoring of lakes, rivers, reservoirs, open channels and tides.
- $\pm 3\text{mm}/\pm 5\text{mm}/\pm 10\text{mm}$ (Accuracy)
- Agricultural irrigation, sewage treatment, hydrology and water

RADAR Flow meter

- Water level and flow velocity of open channels, such as river, reservoir gate, pipe network of subterranean river course and irrigation channel, Assisting water treatment operation, Flow measurement and water entry and drainage monitoring
- Speed range: 0.15~21m/s;
- Speed accuracy: $\pm 8.8\text{mm/s}$;

Ultrasonic Water Level

- Applications: water level measurement of agricultural irrigation, sewage treatment, hydrology and water conservancy, urban underground sewage, rainwater pipeline and inspection well.
- Maximum range: 0.4~10m

'With the development of society, the demand for lightning protection in all walks of life is also increasing. *AUTO Lightning Online Monitoring System* will protect all kinds of lightning protection devices.'

SPD Smart Monitoring Module

Lightning protection component test instrumentation

*MOV/GDT manufacturers
Application manufacturers*

Lightning impact simulation platform test equipment

- SPD manufacturers
- Certification bodies
- Meteorological centers
- Military departments
- Laboratories.

Automated testing equipment

- For MOV/GDT/SPD manufacturers and
- CRCC certification

Smart Monitoring Modules for Lightning Online Monitoring Systems

- Telecommunications
- Electric Power
- New Energy
- Airport, Railway
- High Way
- Smart Grids and
- other industries

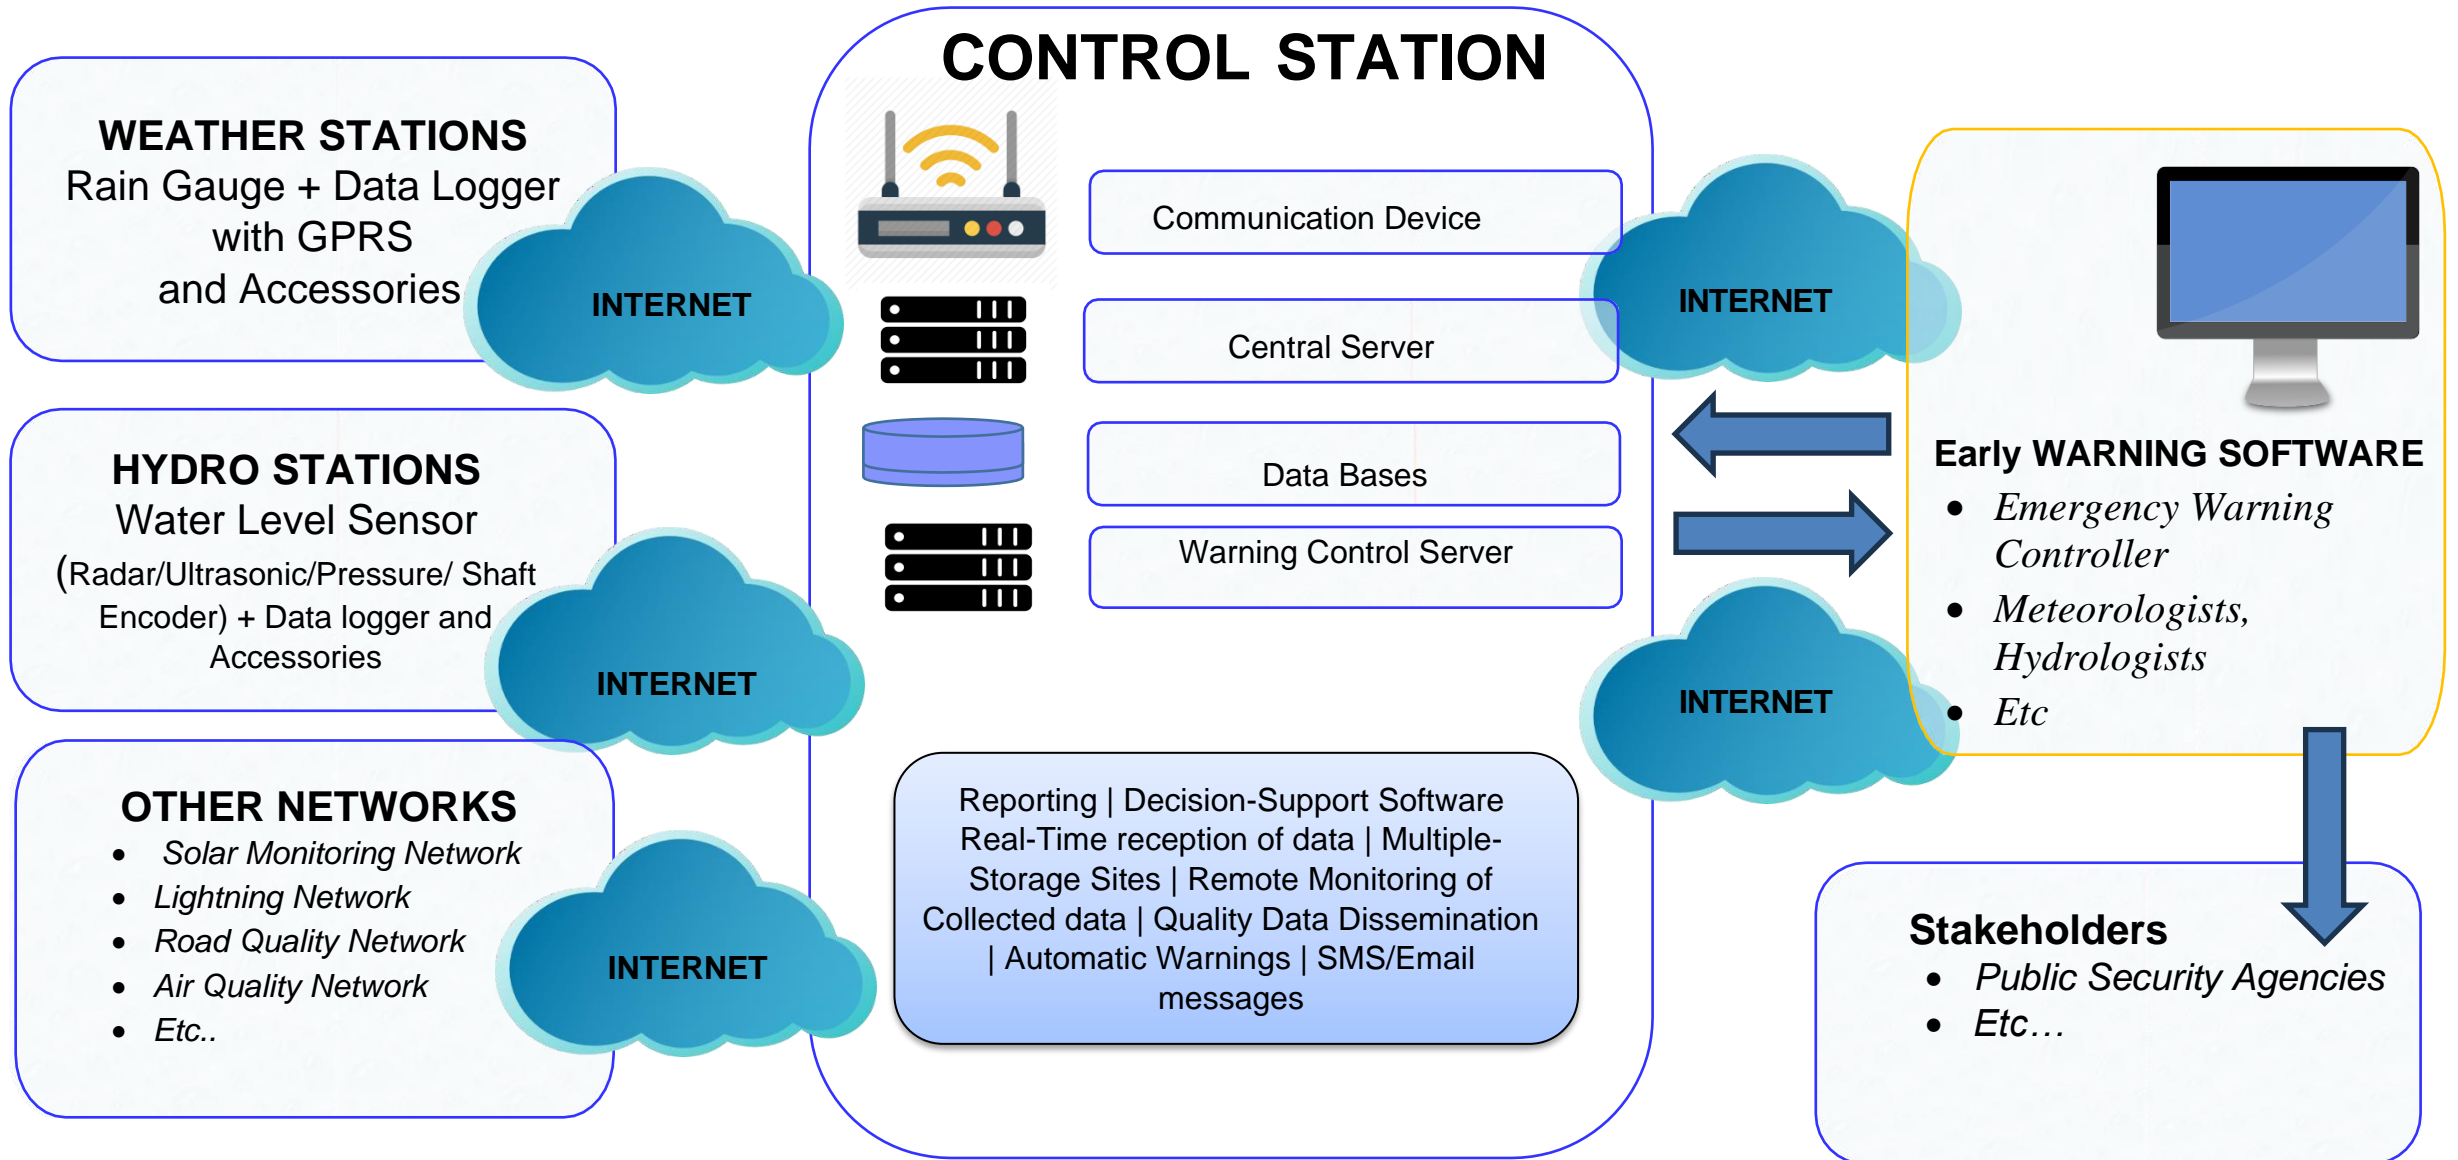

Lightning Wave Generators

- SPD manufacturers,
- Application manufacturers, Certification
- organization

Hydrometeorology – Early Warning Network Example
